Get Swellnet Pro Andrew McKinnonOz ReporterLast updated Nov. A short distance 1 - 2ft ONE windwell combined with SE swell due to yesterday's southerly winds change. Knee-high at best with occasional waist-high sets on the magnets - it looks pretty weak, but at least it's breaking on an 8.30am low water. Worth the early paddle before the northerly wind rises. Rest of the day Outlook: NE windswell combined with a new SE windswell continues to come in at low levels throughout the day, as winds turn ENE at 10 - 15 ks in the middle of the day becoming variable in the afternoon. Try the wide open beach breaks for later on Good bye. The high tide is at 15.00 and it runs back to a 22:00 low. Happy Sunday. Bronte Beach (NSW) located 200 m south of Tamarama and is a slightly larger beach at 250 m long, but with a larger crack. The beach is located in a picturesque valley, occupied by 10 ha Bronte Park. The park and a moderate amount of parking in the... Read more Bronte Beach (NSW 323) is located 200m south of Tamarama and is a slightly larger beach at 250 m long, but with a larger crack. The beach is located in a picturesque valley, occupied by 10 ha Bronte Park. The park and a moderate amount of parking cut into the old tram, plus the government bus service make Bronte a popular beach. But this popularity keeps lifeguards and year-round lifeguards busy with an average of 130 rescues a year. The surf club was founded in 1907, although the patrols began in 1903. The beach is fronted by a surf zone that is usually occupied by 2-3 rips, one on either side against the headland (Fig. 4.242), and sometimes a third in the center, with a rock pool on the southern head adjacent to the surf club. The southern headland rip is known as the 'Bronte Express' and offers a quick ride out to sea. An additional danger are the rocks on the south side of the beach, an area favoured by board riders. Swimming If you swim at Tamarama or Bronte, be sure to stay between the flags. Check your location as rip feeder currents will move water and you will tear toward the north or southern headland, depending on the wave direction. If you're caught in a rip, stay calm, raise your hand and wait for rescue. Surfing Both links and rights can be found between the rocks at McKenzies, while Tamarama is closed to board riders during patrol hours. Bronte Beach is open to boardriders and includes Bronte Reef on the south side, which can produce good rights during east to southeast singa by sing, while a beach holiday left occupies the northern half. Fishing All three beaches offer rock fishing and good coastal gutters, when not too busy with swimmers.
